Title of the article: "WHEN FRANCE BECOMES ANTI-AMERICANS".

Subtitle : "THE COMPLEXITY OF FRENCH THOUGHTS"

Teaser block : Since a while I keep hearing that french people are anti-Americans with such conviction that it became a bit ridiculous. It is maybe because of the fact that they do not like to follow blindly the international policy of the actual socialist Government.

It is a historical right (hardly gained !) to be able not to follow what is felt wrong. It is also what are commonly called freedom of thoughts and freedom of speech. Each time there is some «tension» with America, pre-conceptions come up as quickly as one can regarding French and what they «mean» behind any criticism.

As those two nations confront great challenges in a world of uncertainty, the strength of the countries' relationships fluctuate according to the world tensions and strategic national interests. One cannot deny the close political collaboration through United Nations and the G8, military collaboration through NATO, the economic collaboration through various public and private sectors...

All this contributing to enhance the relationships between the two countries. And we can go on and on...

Therefore, I recently heard about «The american enemy» and was told about the «long history of french anti-americanism». It seems that it is not just a recent fever coming up with any disturbing and disagreeable episode of Franco-American relations. Also, against this «strong feeling», sometimes (maybe inadvertently) a short space gap arise of «Americanomania». By asking around, I was told that in the mid-1980s, pollsters and political analysts proclaimed that anti-American sentiment was in recession and would very quickly disappear in France.

Anyway, still in mind and in discourses from atlantist politicians and intellectuals (openly very fond of the american policy, domestic and international) and way of life, keep «reminding» us here via media that french anti-americanism is a historical construct with deep roots in french culture... It started far before the Vietnam War, even in the 1930's which was its peak. All the ingredients were existing more than a century ago, its narrative structures largely formed, its argumentation polished up, the domestic divisions hidden behind it

in a large consensus...

Where does all this come from ? Why this one way idea regarding the assumption of this so called evidence ? In France, many from the population, feel that this kind of statement coming from a part of the french intelligentsia is wrong. That there is a strong adherence being a narrative, working through repetition. Its strength is in its stubbornness. Sartre in 1946 said «I am not anti-American. I do not even know what the word means». Was he hypocrite or true ? We can take any statement and remember what suits us.

It doesn't change anything that from both sides, criticism should be accepted. France is accused, since Sartre (I suppose because of his political ideas) of denial, being the obligatory preamble to any use of anti-American rhetoric. Why not assume that it determines a certain number of attitudes and behaviors going on to taking it to the level of concept ?

It is very respectful to be nationalist and to have a set of values judged to constitute part of the national identity. No problem with that but one has to understand that they cannot become automatically the world's values. A personal identity and a national ideal does not mean international ones.

We can export some and accept others to be refused or criticized. Glorified in the 1920's by a boom of prosperity, americanism was tending to take over and trying to create a number of traits characteristic of american «civilization». If the american way of life (efficiency, productivity, access to material goods...) means a reference to the western world, France believes that it cannot agree, otherwise the country wouldn't be so popular regarding human rights, culture, philosophy, diplomacy... So many countries were inspired and looking up to France for decisions and help.

Americanism becomes hard to export. Even if America's power pushed the term all the way across the ocean to Europe, France believing to be an alternative counting on its history and intellectual conquests and concepts. There is no anti-americanism at all, just a problem of definitions and intellectual concepts. anti-americanism is just a discourse used to please personal passion and/or interests.
